

MY CONTAINER

Personal power plant

MY CONTAINER

The goal

The goal of the project is to create a container with stand-alone gaming integrated renewable technologies, easy to install to be marketed initially in the North Africa region in considerable economic expansion. This innovative energy generating capacity has multiple outcomes:

- Personal and local empowerment through distributed and decentralized energy production.
- Local job creation in technical maintenance and installation of systems.
- Local entrepreneurial activity by creating joint ventures to develop sales and distribution network.
- Education on renewable energy and job creation.

Our mission

Project MyContainer, inspired by the models of the third industrial revolution, smart grid and micro distributed generation, wants to contribute to the transformation of society by providing energy products are highly integrated, innovative and easy to use (user friendly) for the production of energy from renewable sources.
